Maksym Kozlov

Python Developer
kozlovmaksinn@gmail.com | LinkedIn | GitHub | Telegram

Summary

Python backend developer with 2 years of commercial experience, designing, developing and deploying products from a feature list to a running system. Experienced in backend architecture, payment flows and AWS infrastructure.

Experience

Python Backend Developer Jul 2025 – Jun 2026
Zyklum *Germany, Remote*

- **DriveSmart** – *peer-to-peer car-sharing marketplace in Dubai.*
  - Built the backend from scratch on Django 5, DRF, PostgreSQL, Celery and Redis.
  - Modeled the rental lifecycle as state machines (django-fsm): booking, extension, early return, handover, car return, disputes and incidents.
  - Designed the payment system on MamoPay: card tokenization, charges, refunds and owner payouts, covering extensions, early and late returns, delivery, damages, penalties and tiered cancellation refunds.
  - Set up AWS infrastructure and CI/CD: GitHub Actions → ECR → ECS (Django and Celery containers), Application Load Balancer, Route 53, RDS (PostgreSQL), S3, Secrets Manager.
  - Covered the API with automated tests; CI blocks merges on failing tests or lint.
  - Integrated Google and phone (SMS via Infobip) sign-in, Firebase chat and push notifications, Sentry and OpenAPI docs; built an admin panel (django-unfold) for document verification and dispute handling.

Python Developer Apr 2024 – Mar 2025
SolidWay *Poland, Remote*

- **DeliverMyPack** – *Telegram bot for peer-to-peer parcel delivery. Django, DRF, PostgreSQL, OpenAI API.*
  - Built trip and parcel management: travellers publish trips, senders publish parcels, both sides search for a match, and senders get notified when a matching trip appears.
  - Integrated an OpenAI-powered assistant that answers user questions about the service.
- **AME** – *map-based app for booking local services. Django, DRF, PostgreSQL, Firebase Auth, OpenRouteService.*
  - Built provider profiles with services, prices and session schedules; users book sessions and leave reviews.
  - Implemented distance-based provider search (OpenRouteService) and authentication using Firebase Auth.
- **Elio** – *language-learning app for kids. Django, DRF, PostgreSQL, Stripe.*
  - Built picture and word quizzes, user progression, an in-game coin economy and an avatar shop.
  - Implemented premium subscriptions with Stripe, including webhook handling.
- Created a reusable Django/DRF + Docker project template with GitHub Actions auto-deploy; mentored a trainee.

Technical Skills

Programming: Python, SQL, JavaScript
Frameworks: Django, Django REST Framework, FastAPI, Flask
Databases & Caching: PostgreSQL, Redis
Cloud & DevOps: AWS (EC2, ECS, ECR, RDS, S3, Secrets Manager, Route 53, ALB), Docker, GitHub Actions
Integrations: MamoPay, Stripe, Telegram Bot API, Firebase, OpenAI API, Infobip, Sentry
Testing & tools: Pytest, Unittest, Git, Swagger/OpenAPI, Postman
Languages: English – Upper-Intermediate (B2), Ukrainian – Native, Russian – Native

Education & Certifications

AWS Certified Cloud Practitioner – Nov 2023
Meduzzen – FastAPI internship (async Python, Docker), Feb – Mar 2023
